

Graphical reports generated from the user access logs of external users accessing Box shared content. The analytics can be filtered for different user access policies. Reports include the following:

System Usage

Provides a dashboard view of the usage of the system. Records the grant/deny counts for the day, the past week, the past 30 days and the past 90 days.

Grant/Deny counts over time

A line graph that plots the number of grant and denies for user access policies over time

Unique User Counts over time

A line graph that plots the number of unique users over time

Browser and Operating System usage

A pie chart that shows the distribution of browsers and operating systems used.
